Entered January 27, 1901, at Richmond, Va., as second-class matter under act of Congress of March 3, 1879.

MONDAY, JANUARY 31, 1910.

THE SENATE'S TAX PLAN.

The Senate is not likely to be misled. In seeking to frame an equalization bill, it will hardly heed those critics who oppose rational plans of reform when they have no just substitutes to offer. We do not expect to see it deliberately turn its back on the tax commission plan, which has been successful wherever introduced; nor will it, we are sure, for the supposed simplicity and imagined economy of the device, adopt the board of equalization plan, which in practical operation is little better than farcical. In the alternative between real reform and hybrid patch-work, we feel confident that the upper House will choose wisely.

One of the three plans now before the House must be adopted, before the others can be put into effect. This is Senator Fletcher's plan for this year's equalization through the Auditor. We do not like this plan. Its defects are numerous, its fundamental weaknesses are apparent, its operation must be cumbersome and ineffectual. But real estate must be assessed this year, under the Constitution, and a tax commission cannot begin operations for some months. Senator Fletcher's plan, by exclusion, offers the only way at the moment to secure justice to the State under the assessment. The State must take this or nothing. It must have the Auditor approve the assessors' findings or leave the assessors to their own pleasure.

The real alternative, therefore, is between the two plans which are offered in connection with the Fletcher bill, in order to provide for a full investigation of our entire tax code. Without some such arrangement, 1912 will find us just where we are to-day. Either the Strode plan or the King plan must be approved. Between the two we do not see that there can be room for argument, aside from the chit-chat of sectional representation and the sophistry of immediate economy. The King bill is not a new idea, brought forth as an experiment by an ambitious legislator. It is modeled on the California plan, which is recognized the country over as the most lucid, the ablest and the justest plan now in operation. It provides precisely what is needed: an expert to examine the tax system of the State in detail and to report on its defects. It directs, to be sure, that other men shall be appointed, five in number, to advise with the tax expert and aid him in his work. But the expert's work is the keynote to the bill. If this plan carries, and if its provisions are obeyed in spirit and in letter, a report will be presented to the next Assembly which will become a classic, not only in aiding our own reform, but in helping other States in the same direction.

In comparison with this plan, the Strode bill has absolutely nothing to recommend it. It is not economical. It is not scientific. It is not judicious. It gives the real authority into the hands of ten members of the Assembly, who are to meet in Richmond, tour the State, examine the tax laws, and, in spare moments, formulate a report. None of the members is to be an expert. None of them is to give his full time to the work. They are to draw a sizeable per diem and work at their discretion.

And what will it all amount to? Absolutely nothing, we surmise, except furnishing copy to the Public Printer. It is perfectly obvious that where there is no expert advice, no trained men, no directing authority, and no fixed responsibility, no permanent good can result. The ten legislators on the so-called commission might have all wisdom and all understanding. They might know taxation from the days of Colvert. They might be patriots. They might be statesmen. But where they are not trained for the work, paid exclusively for the work, and versed in every detail of the work, they are simply incapable of serving the best interests of the State.

The responsibility is now on the Senate. Its members have debated the plan at length and have received new reports on it in the next few days. On their decision the choice of the House may depend. It is for them to say how good or how bad Virginia's tax laws shall be.

AN EXPERT ON RUGBY FOOTBALL.

While the Virginia Legislature has before it a measure to make football playing a misdemeanor in this State, it is well enough to remember that "football" is a large word and includes several games that are quite unlike each other in character. If the "anti" bill should be passed, it would, we assume, prohibit football of all styles and kinds, no matter how successfully the American game was revised, no matter how ready the colleges were to take up Rugby or soccer. The situation, as the last season illustrated it,

is bad enough, but it certainly does not need so drastic a handling. The rules committee, which meets again early next month, should be given a chance. Then, too, there is the prospect of introducing and establishing the English game, of which our own game is a roughened descendant.

As the risks and dangers of the present American game have become more and more apparent, Rugby football has attracted a growing amount of interest. Very instructive testimony as to the merits of Rugby are given by Donald Grant Herring, an American Rhodes scholar, Mr. Herring, intercollegiate heavyweight champion at wrestling in his day at Princeton, played on the Princeton football team of 1906 and later on the crack Rugby team at Oxford. Few men living, therefore, are in better position to weigh and contrast the two games. Asked for his opinion of the Rugby game by the Daily Princetonian, Mr. Herring replies that "I enjoy playing it extremely," and significantly adds: "I never pretended to any one, even to the coaches, that I enjoyed playing the American game." Then he says this:

In a season more than twice as long, with a much larger playing body, the serious injuries at Rugby are not more than 4 per cent. of those at the American game. This is a conservative statement of opinion from which I will not recede.

Here are two great merits declared for Rugby by an expert who not even the most savage defender of the present game could class among the moon-boodles—pleasure to the player and comparative absence of risk flow about it from the spectators' point of view. The Princetonian, commenting upon Mr. Herring's article, says that "the tremendous size of English crowds is conclusive proof that Rugby is more interesting to non-partisan spectators, and equally so to partisans of either team." With partisanship and "atmosphere" eliminated, it is doubtful whether the discriminating stranger would regard the present American game as in any way a particularly good one to watch. Certainly it has never taken hold of the great mass of the people as baseball has.

The Virginia Legislature ought to approach the Parks bill circumspectly. To enact it would be a mistake. There is every reason to believe that America can either evolve or borrow a football game which nobody need object to. But if absolute prohibition should be necessary, let us leave the plying of the axe to the colleges.

REVIVING THE EXECUTIVE COUNCIL.

The bill for a State Executive Council has gone to the committee mill, there to await its turn as grist for thought and seed for legislation. After it has been inspected, discussed and rolled by the hard-working millers, it may come out for the approval of the two Houses. In the meantime, those who are interested in the revival of an old-time institution will have to wait, and those who cast longing eyes towards one of the five honorable titles which are to grace the Governor's advisers must rest as plain Ministers for the time being.

Whatever its ultimate fate, this bill shows how the political train sometimes has use for discarded wagons. We left the Executive Council at the mile-post in 1850, as dilapidated, outworn, rickety and worthless. Now men are proposing to send back to the rear, grease the old machine and use it henceforward to assist in carrying the Governor of the State.

Prior to the time when the stormy but thoughtful Convention of 1850 discarded the Executive Council, that body played an important part in the State's history. Lineally descended from that remodeled King's Council which James planted in Virginia, under the first charter, the council survived the overthrow of royalty and was made a part of the government of the State by the Constitution of 1776. With its membership reduced from eight to three, it remained operative until the Madison-Monroe Constitution of 1830 was thrown aside.

Under the monarchy, the council has been legislative, judicial and executive, but when George Mason's Bill of Rights cut united powers of government, the council was made executive in principle and advisory in practice. Its members ambled thrice a week to the Council Chamber in the old Capitol, and there heard Patrick Henry, or Edmund Randolph, or Henry Lee, or some other notable, tell what malice he had received as Governor; what contingent funds he had expended, or what pardons he had issued. The council would sit by, discuss, vote, advise and finally leave it to the Governor. Not until Edmund Randolph came along, with his growing Federalist ideas, did he note in the Journal that what was done was done by the Governor, not by the council.

But where they could do little, in normal times, by law, the council did much by surffiance. He was a darling Governor who dared go against the judgment of eight gray beards, and a wiser one who heeded the cool counsel of the old statesmen. Then, too, in times of danger or war—as when the French cruisers fitted up in the bay, or Henry Lee marched off to put down the Whiskey Rebellion—the council was really the executive of the State directing, commanding, disbursing and rewarding.

Perhaps it may be wise to revive the council. Perhaps five business men could materially aid the Governor in working out his policies. But, at the least, let no unthinking legislator laugh at the bill which would revive so ancient and honorable a body.

A LAWYER'S \$750,000 FEE.

Samuel Untermyer, the corporation lawyer of New York, has received a fee of \$750,000 for his services in bringing about the recent merger between two copper companies. Mr. Untermyer's labors extended over three or four years, though he did a good deal else during that period than merge copper companies. Possibly a year's or half a year's full time would cover all that he gave to the work which netted him his three-quarter-million-dollar fee, though this is conjecture. At any rate, though the court apparently approved of the fee, minority stockholders in one of the companies objected to it as extravagant, and we find the Springfield Republican inclining to the opinion that it is "scandalously excessive and without any reasonable economic justification."

But when is a reward excessive and on what is the economic justification for a reward based? Lawyers, like other men, ask for their services what those who engage them are willing to pay. A lawyer swings no club or wields no magic. If he asks pay at double or triple what his services are worth, he would not be likely to attract many clients. If these copper companies could have gotten their combine legally worked out to their complete satisfaction for \$100,000, say, we suppose they would never have been willing to pay Mr. Untermyer \$750,000 for doing it. Yet they were quite willing to pay him this sum, the largest single fee, it is said, ever paid to a lawyer anywhere. Opportunity, luck, prestige, all count for a good deal in these matters. Possibly other lawyers could have done the job as well, or even better, at a much more moderate fee, but the copper people did not know of them, or did not believe that any such existed.

Supreme fitness commands exceptional rewards in all lines of activity. The uniquely equipped man, the best man for the job, can have pretty nearly his own figure. John Hays, Hammond's last contract with the Guggenheims called for an annual salary of \$500,000. Charles M. Schwab was given \$1,000,000 a year in salary and commissions to take the management of the steel trust. These two were regarded by their employers as "necessary" men. Their services were supposed to be of the kind which brings back sums much larger than the salary involved. Other engineers and steel men, possibly equally good, had failed to convince equally liberal employers of their supreme fitness. Tenyson received \$10 a word for his poem "The Throats," and Conan Doyle was paid \$45,000 for twelve Sherlock Holmes stories. Were they "overpaid?" Who shall say? The matter seems to rest between the payer and the paid, and it all depends.

Borrowed Jingles

YE POEM OF YE MONTH.
Now comes Feb., the month of slush,
When the streets are all awash
With the rattling waves of slush,
When the angry, onward rush
From the gutter to the foot
Where the waiting fishes bob.

Month of sneezes, month of sniffs,
Month of early springtime whiffs;
Time for rubber and goosh,
Time for gaily mackintosh,
Saucer time for the ice-cream cone,
Or for summer underclothes.

You were wise to have a care
As to garments that you wear.
If your nether duds are thin,
Wear without your shirt a skin.
If the same are warm and thick,
Light spring coats are politic.

Keep your toes and spirits dry
As upon your way you fly,
Forgetting now's the day
Of the frozen ground and ice.
It were well to use a hob
When you travel round in Feb.

—Judge.

MERELY JOKING.

In Boston, Did You Say?
"And how are you, little girl?"
"Six."
"And how is it you are out walking without your mamma?"
"Oh, mamma, I went out for exercise. Really, we have very little in common."—Boston Herald.

Class Pride.
"Once I thought I would learn to be a chauffeur."
"But now I have changed my mind; I wouldn't want people pointing at me as 'the chauffeur's boy.' I'd rather be an heir to a baronet."—Boston Herald.

Will Every Man Know?
Joshua had just made the sun stand still,
"My wife wanted me to climb into evening dress," he exclaimed.
Herewith his lordship presented his comfortable armor to the waiter.—New York Sun.

Farmer Grayneck—Spare you are gone to get the automobile lever, Ezzy, like a champion. I'll be right back.
"Farmer Hornbeak—Nepot! I've been vaccinated in the pocketbook, and it took—tuck."

How can your firm beat our company? We sell the only absolutely burglar-proof safe in the world.
"It's all we sell, cashier-proof safes!"—Cleveland Leader.

Most Anywhere.
"Don't be afraid of the bacon, Mr. Jenkins," said the landlady to the new lodger. "Not at all, madam. I've seen a piece twice as large and it's not frightened me a bit."—Sacred Heart Review.

SOME SOUTHERN SHARPSHOOTERS.

A MOVEMENT is on foot in Virginia to increase the number of colonels on the Governor's staff. We suspect that the movement is being pushed behind the movement—Augusta Chronicle.

St. Louis wants a hookworm convention, says Governor Hodge, of Missouri, demurely. Since the Governor followed in a reception and a joy ride over St. Louis with Dr. Cook, he doubtless feels that he got the hooks a-plenty, and is not trigant to me a bit.—Sacred Heart Review.

To the charge of his critics that he is making a botch of our foreign policy, Secretary of State Taft retorts that the domestic and legislative policies of the administration are by no means botches.—New Orleans News-Democrat.

J. J. Hill says to us to go back to the country. He himself seems to have done this, leaving the farm—Memphis News-Scimitar.

Pittsburg spent last year \$2,000,000 more for chewing gum than it gave toward the support of foreign missions. That town is inexcusable.—Birmingham Age-Herald.

A woman lost her voice in an automobile accident and was awarded \$15,000 damages. Nobody picked the voice from the wreck. It is probable that the owner of the wrecking party is now in the hospital, and nobody may try to lose like we when we hear of the verdict.—Florida Times-Union.

STATE PRESS

Stuart for Congress in the Ninth.
A leading Democrat of Tidewater says: "I am in favor of Henry Stuart for Congress. The man may not get him, but I don't doubt the question. There is no other man in the district who can carry this district, or this State, as to that, for any office he is qualified to hold. He is a man of the people. We have no information whatever on the subject, but feel entirely safe in saying that the unanimous choice of the voters of the Ninth. But, will Mr. Stuart consent to allow his name to be used? Will the honor and the prestige of the district be an inducement for the redemption of his district? This is the question.—Clerk Valley News.

The Milk Inspection Bill.
A bill now pending in the Legislature promises to put milk inspectors under the charter of the city of Richmond. The bill would not work for the larger cities milk inspection should be a daily process and daily inspectors should be frequent. As the city and not the State should pay the cost of them. At the same time it is a daily inspection of the milk, and the cost of hundreds of thousands of dollars in a dairy should be at the mercy of a single city inspector, and our city access to the best plan will be to have the inspectors by city inspectors with the right reserved for the State to appoint some recognized authority employed by the State. That would protect both sides and give an easy way for the State to get a better milk supply. It would be a good thing for the people from outside who think it coming here to Virginia to establish dairies. With our dairy resources and our access to the largest markets we should be among the greatest producers of dairy products in the world. It is an industry which should be fostered and encouraged. It should be protected against improper removal, and also against the sale of new, inferior or adulterated milk. Some may engage in it. Honestly, reasonably and sensibly local inspection and regulation will be the best way to secure a satisfactory and reassuring to all concerned.—Roanoke Times.

The Dangerous Milk Bill.
The bill, now pending in the General Assembly, which provides for a State licensing of dairies, contains a provision which threatens the efficiency of the municipal regulation of the city of Lynchburg. As stated in the news columns of the Advance yesterday, the measure prescribes a certain quantity of milk to be sold within its limits, the State Pure Food law is given, and the city is required to make final decision upon any grievance against local municipal rulings as to the quality of the milk or the condition or method of the operation of the business selling milk in a given city. This provision practically renders null and void the work of local milk authorities, and because of it, the bill becomes one that may at any time be a dangerous one. The bill under the name of the operation of the business selling milk in a given city.
